EDUCATION

NATIONAL UNIVERSITY OF SINGAPORE (NUS)

Aug 2023 - Present

Bachelor of Science in Business Analytics

- GPA: 4.76/5 - Honours (Highest Distinction)
- Prospective Specialization in Machine Learning-based Analytics
- Internship Availability: 11 May 2026 - 7 Aug 2026 (Full-time), 8 Aug 2026 - 30 Nov 2026 (Part-time)

NGEE ANN POLYTECHNIC

Apr 2018 - Apr 2021

Diploma in Financial Informatics (Merit)

- GPA: 3.93/4, Directors List (2018 - 2020)
- Specialization in Financial Analytics

WORK EXPERIENCE

ALPS PTE LTD, Data Analytics and Information Systems Intern

Jun 2025 - Dec 2025

- Migrated HEALIX system, dashboard, and data to Databricks, ensuring smooth transition.
- Built, improved, and maintained Tableau dashboards leveraged by stakeholders.
- Designed and implemented SharePoint site to provide centralized access to updated information.

DELOITTE, Risk Advisory Intern

Sep 2020 - Feb 2021

- Performed journey testing on client's data using ACL to assess process accuracy.
- Identified and analyzed potential risk areas to recommend mitigation strategies.
- Evaluated the effectiveness of the client's system controls, contributing to compliance and security.

PROJECTS

HEALTHCARE CAPSTONE PROJECT, AI Engineer

Jan 2026 - Apr 2026

Agentic collaborative reasoning for cancer research

- Architected a secure LangGraph multi-agent system that runs offline via Ollama, enabling clinicians to query complex OMOP CDM healthcare data in natural language.
- Designed an auditable Human-in-the-Loop workflow requiring clinician validation.
- Developed specialised AI agents for dynamic SQL generation and automated statistical analysis.

JUDICIAL ANALYTICS, Data Scientist

Jan 2026 - Apr 2026

Predicting defendant liability in Singapore corporate litigation using deep learning.

- Built a Hierarchical Attention Network (HAN) with SwiGLU to capture multi-level legal nuances.
- Engineered a 3-stage GPT pipeline to transform PDFs into ML-ready JSON via LLM-as-a-Judge.

P2P LOAN DEFAULT PREDICTION SYSTEM, Data Scientist

Jan 2025 - Apr 2025

Built different models prioritizing a high recall rate to detect potential defaulters.

- Processed 2.9 mil loan records using PySpark and leveraged PCA to reduce features (83 to 62).
- Addressed class imbalances using SMOTE and ENN; trained LR, RF, SVM, and GBT classifiers.

HDB RESALE FLAT PRICE PREDICTION, Data Scientist

Jan 2025 - Apr 2025

Built models using feature engineering and different optimization techniques to predict resale flat prices.

- Leveraged OneMap API to engineer distance-related features such as proximity to nearest MRT.
- Trained LR, SVM, NN, RF models, and utilized optimization technique grid search.

NUS ORBITAL (GEMINI), Developer

May 2024 - Aug 2024

Orbital is the School of Computing's self-driven programming summer experience.

- Utilised C#, Javascript, CSS, HTML, and Azure to build a platform to enhance student collaboration.
- Addressed class imbalances using SMOTE and ENN; trained LR, RF, SVM, and GBT classifiers.

TECHNICAL SKILLS

- **AI & Machine Learning:** Agentic AI Systems, Multi-Agent Pipelines, Deep Learning (Transformers, LSTMs), NLP, Predictive Modeling.
- **MLOps & Tools:** MLFlow, PySpark, Tensorflow, Databricks, AWS.
- **Programming & Frameworks:** Python, C#, Java, JavaScript, Vue.js, HTML/CSS, LaTeX, UiPath.
- **Data Engineering & Analytics:** Data Migration, SQL, Tableau, Statistical Analysis, Excel.
- **Databases:** Azure Database, Firebase, SQL Database.
